

Figure 1 is a line graph showing the performance of the proposed method (orange diamonds) compared to baseline methods (blue circles and black circles) across 15 instances. The y-axis represents performance, and the x-axis represents the number of instances. The proposed method consistently outperforms the baselines, especially for the 'absolute targets' and '1.2.1' tasks. The blue line shows a sharp drop in performance for the 'absolute targets' task, while the black line shows a more gradual decline. The orange line shows a steady increase in performance across all tasks.

Task	Baseline 1 (Blue)	Baseline 2 (Black)	Proposed (Orange)
15 instances	High	High	High
absolute targets	Low	Medium	High
1.2.1	Low	Medium	High

absolute targets

1.2.1
