

Figure 11 is a line plot titled "11 Discus". The x-axis represents the number of instances, with labels 2, 3, 5, 10, 20, and 40. The y-axis represents a performance metric, with labels 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, and 16. The plot shows the performance of the proposed method (orange diamonds) compared to baseline methods (blue circles and red crosses). The proposed method shows a steady increase in performance, while the baseline methods show a sharp drop at 3 instances. The plot includes a shaded orange region representing the confidence interval and a dashed line for the absolute target.
